

SC AGRITOURISM FARM CAMPING

Camping on farms is growing in popularity, and we want to make it easy for campers to find a farm in South Carolina to camp. Please fill out the [Agritourism Farm Camping Registration Form](#) to have your farm included on the SC Agritourism website.

People want to camp on farms to **reconnect with nature** and enjoy the peaceful environment away from urban life. Farms offer a unique setting, surrounded by open fields, fresh air, and the beauty of the natural landscape. Camping on a farm allows people to **immerse themselves in rural life, engage with animals, learn about agriculture, and even participate in hands-on activities like harvesting crops or feeding livestock**. It provides an opportunity for relaxation and adventure, offering a slower pace where families and friends can bond, unplug from technology, and experience farm-to-table living firsthand. This type of camping can also be an educational experience, **deepening people's appreciation for sustainable farming and the hard work that goes into food production**.
